

# Emergency and Evacuation

## QUALITY AREA 2: CHILDREN'S HEALTH AND SAFETY

### Policy Statement

Our education and care service is committed to identifying risks and hazards of emergency and evacuation situations, and planning for their reduction or minimisation, and ongoing review of planned actions around handling these situations including:

- ◁ Conducting ongoing risk assessment and reviews of all potential emergency and evacuation situations, including medical emergency situations (see Medical Conditions Policy);
- ◁ Develop specific procedures around each potential emergency situation and ensure full awareness by all staff through the provision of professional development;
- ◁ Ensure regular rehearsal and evaluation of emergency and evacuation procedures.

### Goals / What are we going to do?

Emergency and evacuation situations in an education and care service can arise in a number of circumstances and for a variety of reasons. In the event of an emergency or evacuation situation, the safety and wellbeing of all staff, children, families and visitors to the centre is paramount.

### Strategies / How will it be done?

#### Risk Assessment for Potential Emergencies

In preparing the emergency and evacuation procedures, a risk assessment is conducted to identify potential emergencies relevant to our service.

The **Emergency Management Folder** is kept in the office and contains:

- ◁ Detailed risk assessment and control measures of potential emergencies the service may be exposed to. Documentation is assessed and updated periodically and when needed as circumstances change.
- ◁ Detailed, specific procedures to follow in the event of any emergency or evacuation including:
  - » Fire or smoke
  - » Bomb threat / act of terrorism
  - » Snake or other potentially dangerous animal
  - » Loss of power or water
  - » Intruders
  - » Natural Disaster / Severe Storm Procedure:

» Staff sickness and non-arrival of a staff member

◁ A copy of the emergency and evacuation floor plan and instructions are displayed in a prominent position in the foyer near each exit at the service.

◁ Staffing rosters ensure that at least one Educator who holds a current approved first aid qualification and has undertaken current approved anaphylaxis management training and approved emergency asthma management training will be immediately available in the event of an emergency.

◁ Emergency telephone numbers are clearly displayed above every telephone.

## **Discovering an Emergency**

◁ Educators who discover an emergency are required to alert the Responsible Person immediately so that they can determine and implement control measures.

◁ After immediate assessment, the Responsible Person will blow the whistle or other response, depending on the type of emergency.

## **Evacuation Drills and Emergency Evacuation**

Evacuation drills are carried out every three months without notice, at different times of the day, in accordance with the education and care service national regulations.

These drills will be embedded into the programming each term.

◁ Each drill is documented to include the date, time, how many people in the building according to attendance registers, how many people evacuated, the time it takes to evacuate, what simulated emergency conditions (if any), any problems encountered, weather conditions, and any additional notes. This documentation is kept for a minimum of three years.

◁ Simulated emergency conditions consider a variety of practice styles such as scenarios in the rooms, around the yards, and out of the grounds.

◁ There is a large emergency cot that is to be used for any children not walking during evacuations. This cot is to be checked regularly and maintained in a sturdy condition to ensure its safety at all times.

◁ Emergency whistles are provided on key lanyards 'necklace' that educators wear.

## **After the Emergency is Over**

◁ In the event that the building is unsafe to return to, the Responsible Person will notify parents or emergency contacts to collect each child.

◁ If able to return to the building, with reassurance and calmness, walk back to the centre following the safety procedures, recheck that all children have returned and discuss as developmentally appropriate the emergency that has taken place.

◁ Consider counselling services for anyone affected by the emergency.
